

CIS41032: Practical for Advance Database Management System

Department of ICT Faculty of Technology

South Eastern University of Sri Lanka

Academic Year: 2020/2021

Lab Sheet 11

Title: Working with Indexes.

Objective:

- Adding a Single Field Index
- Understanding Index Restriction
- Creating Compound Indexes
- Using Indexes for Sorting
- Understanding the default index.
- Understanding the text index.

Create an Index

```
db collection_Name. createIndex ({field name: 1 or -1})
```

Finding the indexes in a collection

```
db. Collection_Name. getIndexes ( )
```

Drop indexes in a collection

Dropping a specific index

```
db. Collection_Name. dropIndex ({ index_Name : 1})
```

Dropping all the indexes

```
db. Collection_Name. dropIndex ( )
```

Exercise 01 :

Use **persons** database and **personDetails** collection to continue the exercise.

1. Display the persons whose age is greater than 60.
2. Count the persons whose age is greater than 60.
3. Analysis the 2nd question.
4. Create an index to age field.
5. Find the details of output.
6. Drop an age index

Exercise 02:**DB** → companyDB**Collection** → employeeDetails

1. Import Data using mongoimport
2. Display all employees whose age is greater than 60.
3. Count how many employees have salary greater than 100000.
4. Display employees from the IT department only.
5. Show employees sorted by salary in descending order.
6. Create a single field index on age.
7. Create a single field index on salary.
8. Display all indexes in the collection.
9. Analyze query performance of:
